Clear Industry participating IE Expo China

China is an almost inexhaustible market, an economic powerhouse and a growing nation with a high demand for innovative solutions from the field of environmental technologies. IE expo China - Asia's leading trade fair for environmental technologies - reflects the demand for products and services in the fields of water, waste, air, and soil.

After being postponed numerous times due to China's efforts to prevent the covid-19 epidemic, IE Expo China 2022 finally opened in Shenzhen on November 16th. At its 100-square-meter booth, Clear Industry, a subsidiary of Josab in China, advocates sustainable food waste treatment using black soldier fly degradation. Meanwhile, Clear Industry exhibited Josab ZEOBOX, the world's first zeolite drinking water dispenser.

There is a great demand for environmental-friendly and non-polluting waste disposal methods. as the average daily output of urban domestic waste in China is 600,000 tons, of which kitchen waste accounts for 40% to 60% of the total.

Clear Industry exhibited and demonstrated the entire food waste treatment process at the exhibition. It mainly includes AQUAQ pre-treatment process, water purification treatment, oil recovery, anaerobic biogas production, biological denitrification, insect biodegradation and feeding process.

At this exhibition, Clear Industry also introduced the business model of exchanging drinking water by earning points from the food waste sorting, and promoted ZEOBOX water dispensers and food waste sorting systems in the community. This recommendation is to help city managers further strengthen the effective food waste classification.

FROM NATURE TO NATURE

Highlights of the Month

Josab launches the world's first indoor zeolite water dispenser

The global drinking water supply is facing many challenges, including sustainable development and safe water supply to the public. Josab Water Solutions offers a series of integrated automated solutions for the treatment of raw water to supply clean water in local distribution networks to meet future application requirements.

In November 2022, Josab's first zeolite water purification dispenser, ZEObOX™, an all-in-one machine was launched at the 2022 China IE Expo. ZEObOX™ is the only zeolite based water purification and distribution system designed for indoor use.

ZEObOX™ is made for communities with no access to drinking water. The system can be installed in private or public areas like shops, stadiums, stations. Drinking water from ZEObOX™ can be paid by card in various volumes, with options for cold or warm drinking water. ZEObOX™ has an integrated water filtration system that processes the water from the city water network, providing pure drinking water that meets the highest standard of quality, conveniently and, at a low cost.

Cooperation MOU signed with Qingdao Haohai

The Cooperation Memorandum of Understanding between Josab Water Solutions AB and Shuifa Haohai Environmental Technology (Qingdao) Co., Ltd. were officially signed in early November. The two parties have determined the timetable for the joint work. In order to promote the production and sales of products in China, market research, product certificate acquisition, prototype production and other work have begun to be planned and will be implemented according to the timetable.

Josab Water Solution AB is an innovative company, and specialized in water purification systems based on own filter material Aqualite™. The company was formed in 1999, and now has five wholly-owned subsidiaries: Josab Hungary Kft, Josab International Ecological Technology (Beijing) Co. Ltd. Josab India Private Ltd, JBCI 2022 Holding AB and JOSINT Financial Services AB.

ZEObOX™

An effective solution that comes in addition to the public water service. Easy to be installed in any indoor public location, ZEObOX™ purifies water by eliminating all pathogens and other pollutants.

- ✓ Instant UV disinfection
- ✓ Residual disinfection by salt free electrolysis
- ✓ Easy installation on any building's water pipe
- ✓ Zero chemical
- ✓ Very low power consumption
- ✓ Remote monitoring and control by WEB/Mobile applications
- ✓ Installation service, assistance, maintenance
- ✓ 100% automatic, self-cleaning

Drinking water for all in the city.

- Continuously purified and drinking water
- Pay by coins, card or mobile app
- Accepts bottles, carboys and buckets
- Multiple choice: 0.3L, 0.5L, 1.5L, 5L
- Options for direct delivery of cold or hot water

--10 000 liters of water per day!!
